

# Portable 2-tank CIP Cart

The Sprinkman portable CIP cart creates solutions for small equipment cleaning needs. Our CIP skids are highly configurable, featuring portable all-stainless construction with two 75-gallon tanks, an inline heating element, a pump with VFD for speed control, and all the necessary valves and tubing.

Designed with two tanks, an inline heating element, a pump with VFD for speed control and all necessary valves and tubing, this cart is a complete solution on wheels. Simply plug it in and utilize the small, convenient, control panel to operate the cart.

1. Portable. Stainless frame construction mounted on a cart.
2. Speed Control. Includes 1.5 pump and VFD.
3. In-line heater. Electric heating element inline provides ultimate versatility and heating on-the-fly.
4. Easy dosing. Manway for chemical dosing.
5. Quick rinsing. Spray balls located inside the CIP tanks.
6. Stainless control panel. Full control of the pump and heater, including manual heater control, pump speed control, pump start/stop, overall E stop and temperature indicator.
7. Safe. The heater cannot be operated while the pump is not running.
8. Optional add-ons include: Automated heater control, digital temp display.

## Benefits

- Allows chemical or water to go in either tank since both are piped to allow recirculation
- Heating element inline so efficient heating can occur during recirculation to either CIP tank, or on the way to the item being cleaned
- Controls scheme to protect equipment and operators from misuse
- 18" hinged manways stop splashing better than hinged lids
- VFD offers precise speed control for different duties

## Versatility

The Portable CIP Cart can perform many operations including:

1. Recirculating water or chemical to heat-to temperature.
2. Sending and recovering cleaning solution to tank or piece of equipment.
3. Recovery of chemical for re-use.

## Specifications

	CIPC-75
• Tank Capacity (ea)	75 gal
• Flow Rate	50 GPM
• Motor Size	1.5 HP
• Pump	C-114
• Spray Balls	stationary
